

**FREMISTA, LARA DANIELLE V.**

## **HandsMen Threads: Elevating the Art of Sophistication in Men's Fashion**

### **Project Overview**

A Salesforce Customer Relationship Management (CRM) system called HandsMen Threads is designed to manage product inventory, handle marketing campaigns, track orders, and organize customer records in one location. It facilitates more effective teamwork and communication between several departments, including marketing, and sales. Overall, this CRM increases the company's productivity while giving customers a more seamless and customized experience.

### **Objectives**

The main goal of developing the HandsMen Threads CRM system is to make customer management, sales tracking, and marketing activities easier and more efficient. The system is designed to improve data accuracy, and strengthen customer engagement through automation. Using Salesforce tools like workflows, flows, and reports, the CRM allows users to manage customer information, monitor orders, and track loyalty programs. It also supports personalized communication and automatic updates such as order confirmations and stock alerts.

### **Requirement Analysis & Planning**

#### **Understanding Business Requirements**

The business required a CRM that could effectively manage customer data, track product inventory, monitor orders, and support marketing campaigns. The existing manual processes were time-consuming and prone to errors, prompting the need for a digital system that ensures data accuracy and efficiency.

#### **Defining Project Scope and Objectives**

The project scope included creating custom Salesforce objects for products, customers, and marketing campaigns; setting up automation for emails and stock alerts; and establishing a secure environment through proper profiles, roles, and permission sets.

## Design Data Model and Security Model

A structured data model was created linking customers, orders, and campaigns to ensure data integrity. The security model defined user access levels to protect sensitive data, ensuring admins, marketing teams, and sales agents had role-based access.

## Stakeholders Mapping

Key stakeholders include the sales, inventory, and marketing roles. Each stakeholder's needs were mapped to specific CRM features and permissions.

## Execution RoadMap

Salesforce development was divided into phases: setting up of objects and fields, configuration of security models, creation of automation (flows, email alerts, apex triggers), and testing.

## Salesforce Development - Backend & Configurations

Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

## Data security – Profiles

## Data Security – Roles

I created a role sales, inventory, and marketing under CEO role.

## Data Security – Users

I added three users, Kol Mikaelson, Mika Mikaelson, and Niklaus Mikaelson assigned for different three roles: sales, inventory, and marketing.

The screenshot shows the Salesforce Setup interface for managing users. The left sidebar contains navigation links for Setup, Home, and Object Manager. The main content area is titled 'Users' and includes a search bar, a 'View' dropdown set to 'All Users', and a table of users. The table has columns for Action, Full Name, Alias, Username, Role, Active status, and Profile. Below the table are buttons for 'New User', 'Reset Password(s)', and 'Add Multiple Users'.

Action	Full Name	Alias	Username	Role	Active	Profile
<a href="#">Edit</a>	Chatter Expert	Chatter	chatty.00d95000000000000000000000000000@chatter.salesforce.com		✓	Chatter Free User
<a href="#">Edit</a>	EPIC_OroFarm	OEPIC	epic.138e4a0de227@oroform.salesforce.com		✓	System Administrator
<a href="#">Edit</a>	Fremista_Lara Danielle	dan	daniellefremista606@agenforce.com		✓	System Administrator
<a href="#">Edit</a>	Mikaelson_Kol	kmika	laraframista11@gmail.com	Inventory		Platform 1
<a href="#">Edit</a>	Mikaelson_Mika	mmika	laraframista13@gmail.com	Marketing	✓	Platform 1
<a href="#">Edit</a>	Mikaelson_Niklaus	nmika	laraframista2@gmail.com	Sales	✓	Platform 1
<a href="#">Edit</a>	User_Integration	integ	integration@00d95000000000000000000000000000@00d95000000000000000000000000000		✓	Analytics Cloud Integration User
<a href="#">Edit</a>	User_Security	sec	insightssecurity@00d95000000000000000000000000000@00d95000000000000000000000000000		✓	Analytics Cloud Security User

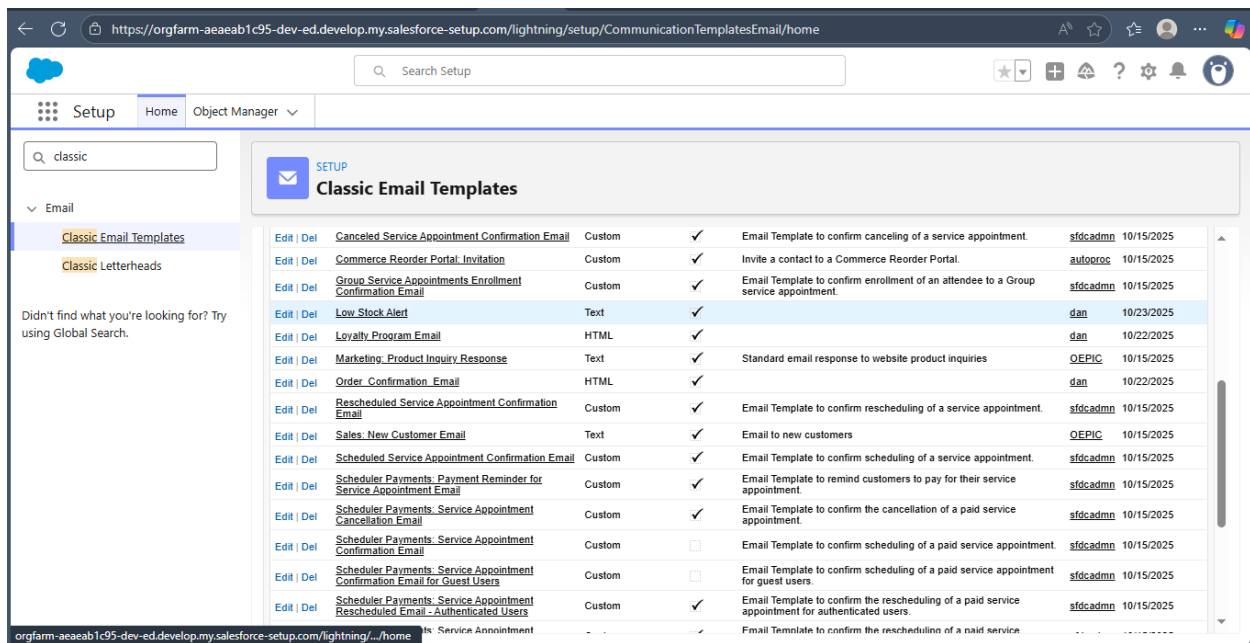

## Data Security – Permission Set

Permission sets: inventory permission set, marketing permission set, and sales permission set.

The screenshot shows the Salesforce Setup interface for managing permission sets. The left sidebar contains navigation links for Setup, Home, and Object Manager. The main content area is titled 'Permission Sets' and includes a search bar, a 'View' dropdown set to 'All Permission Sets', and a table of permission sets. The table has columns for Action, Permission Set Name, Description, and License. Below the table are buttons for 'New', 'Clone', 'Delete', and 'Create New View'.

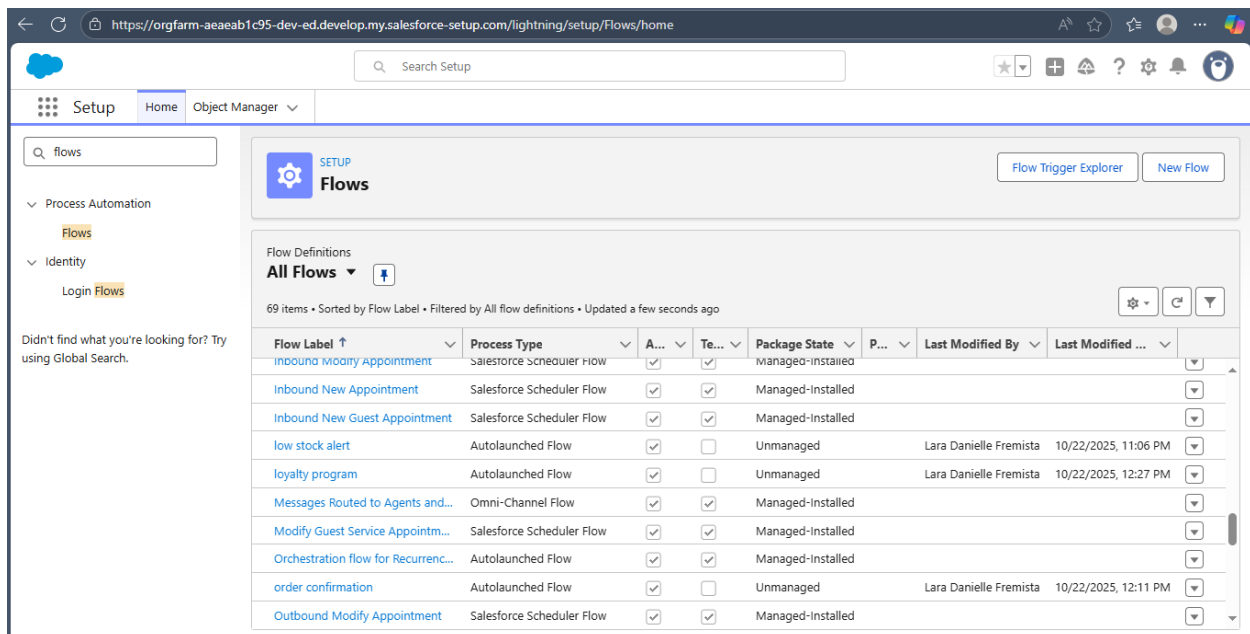

Action	Permission Set Name	Description	License
<a href="#">Clone</a>	Seller-Focused Sales Mobile Experience	Use an experience that's tailored for sellers on mobile. Easi...	Salesforce
<a href="#">Clone</a>	Service Cloud User	Denotes that the user is a Service Cloud user.	Service User
<a href="#">Clone</a>	Shopper	Allow access to B2C Commerce features.	Commerce User
<a href="#">Clone</a>	Stack Service User	Lets users run the flows for swarming with Service Cloud fo...	Slack Service User
<a href="#">Clone</a>	Standard Einstein Activity Capture	Access to Standard Einstein Activity Capture	Standard Einstein Activity Capture User
<a href="#">Clone</a>	Use Enablement Programs	Gives users access to view and complete assigned Enable...	Enablement
<a href="#">Clone</a>	ZoeEventPumpC2CPermSet		Cloud Integration User
<a href="#">Del   Clone</a>	inventory.permission.set		
<a href="#">Del   Clone</a>	marketing.permission.set		
<a href="#">Del   Clone</a>	sales.permission.set		

## Email Template

I created an email template: low stock alert email, loyalty program email, and order confirmation email this is to handle the automated emails.

## Flows

## App Manager (Salesforce Concepts)

## Results of Creating Email Template and Flows

## Automation Using Apex (Creating Apex Classes/Triggers)

### Apex Classes and Trigger

A screenshot of the Salesforce IDE. The top bar shows the URL 'https://orgfarm-aeaab1c95-dev-ed.develop.my.salesforce.com/\_ui/common/apex/debug/ApexCSIPage'. The editor displays the 'OrderTriggerHandler.apxc' file with the following code:

```
1 public class OrderTriggerHandler {
2
3     public static void validateOrderQuantity(List<HandsMen_Order__c> orderList) {
4
5         for (HandsMen_Order__c order : orderList) {
6
7             if (order.Status__c == 'Confirmed') {
8
9                 if (order.Quantity__c == null || order.Quantity__c <= 500) {
10
11                     order.Quantity__c.addError('For Status "Confirmed", Quantity must be more than 500.');The bottom panel shows the 'Tests' tab with a table of test results. The table has columns for Status, Test Run, Enqueued Time, Duration, Failures, and Total. Three test runs are listed, all with a status of 'Success' and 0 failures. To the right of the test results is a table for 'Overall Code Coverage'.
```

Conclusion

The Salesforce CRM implementation for HandsMen Threads enhanced operational workflows, improved data accuracy, and strengthened customer relationships. The system delivers an automated and secure solution tailored to the business’s growing needs in the fashion business industry.
